## If imitation is the most sincere form of flattery...

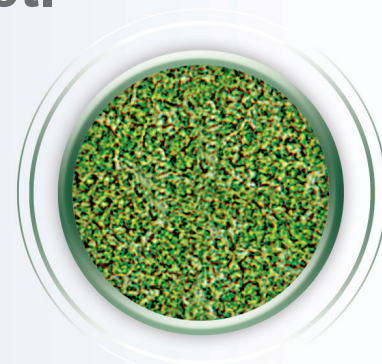

then Sun Chlorella is clearly today's most praised chlorella product on the market.

Seeing is believing. Take a look at these microscopic pictures of other chlorella brands and compare them to ours. You will see that the difference is clear! With the other brands of chlorella, you can clearly see the cell walls are still intact. This makes it virtually impossible for your body to digest and absorb chlorella's powerful nutrients, which are still locked inside. With Sun Chlorella, the cell walls have been pulverized. Therefore, your body has instant access to this nutritional bounty.

In fact, common "broken cell" chlorella has been shown to contain as little as one percent "broken" cells, which means your body is unable to utilize the powerful nutrients chlorella has to offer. With our exclusive patented processing method utilizing the powerful DYNO®-Mill machine, Sun Chlorella is the only chlorella on the market to contain 99% pulverized chlorella. And because we pulverize the outer cell wall so thoroughly, your body receives all the powerful nutrients and the synergy of health benefits Sun Chlorella has to offer.

In a world of imitation and clever marketing ploys, it's not surprising that the industry leader can be copied so quickly by so many.

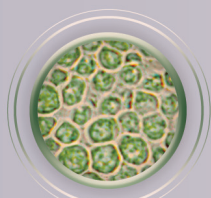

For over 35 years, we have been producing Sun Chlorella and have seen a lot of

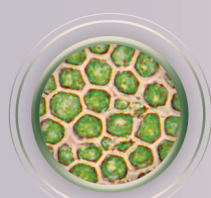

### SUN CHLORELLA

Only Sun Chlorella contains 95% – 99% pulverized chlorella, thanks to our exclusive patented process utilizing the DYNO® -Mill

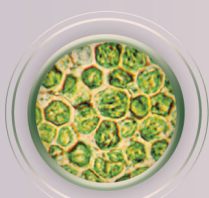

### The Other Brands

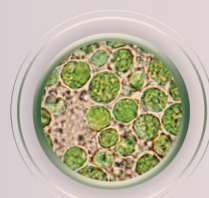

"broken cell wall" chlorella

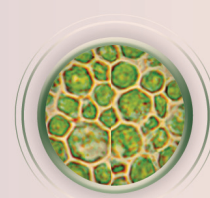

"cracked open cell wall" chlorella

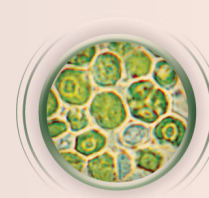

"sound wave broken" chlorella

"cold milling" chlorella

"spray dried" chlorella

"vacuum pressure differential" chlorella

imitators try marketing gimmicks to make their products look better than ours. But once you get past all the hype, one fact remains: **Sun Chlorella is the best.**

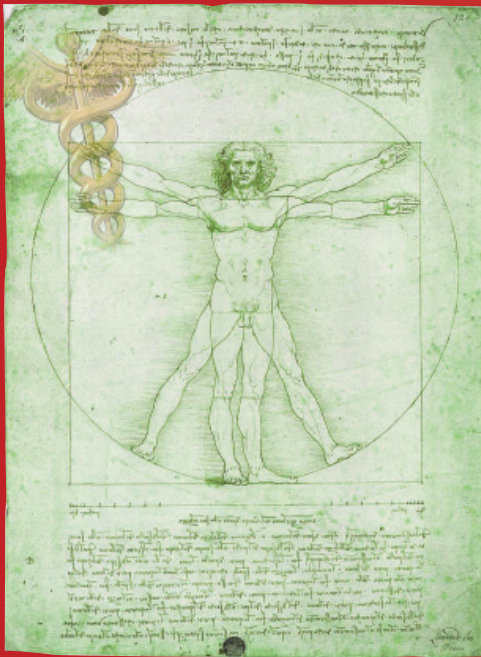

With all the conflicting information out there, it's understandable that the average health enthusiast would get a little confused.

As the industry leader, Sun Chlorella USA wants to set the record straight. We believe that once you see for yourself, you'll discover how other chlorella products

pale in comparison.

Despite the claims of many other companies, not all chlorella products are the same. While many companies claim to have methods that break through the tough outer cell wall, research has shown that their methods are not as effective.

## Detoxification of Dioxin with Chlorella

Environmental chemicals, called dioxins, access our bodies through consuming food and fluids then accumulate in fat cells. Epidemiological studies show that dioxins can cause cancer, birth defects, and immune system suppression. Therefore, reducing dioxins should lower the risks of cancer and other diseases. Innumerable studies demonstrate that minute quantities of Chlorella added to the diet can prevent dioxin uptake from the GI tract and promote their excretion from the body.

Dioxins can also be transferred from mother to fetus via the placenta or to nursing infants via breast milk. Japan conducted a study, 44 pregnant women divided into two groups; 23 added 6g of Chlorella daily to their diets for the last 6 months of pregnancy while the other 21 did not. Findings showed dioxin levels in breast milk, for those taking Chlorella, significantly reduced by 30%. Research demonstrates that Chlorella can be considered a "functional food", providing the body with ample amounts of nutrients, besides helping the body protect itself from the potentially harmful effects of dioxins.

1. Nakano S., Takekoshi H., Nakano M. Chlorella (*Chlorella pyrenoidosa*) supplementation decreases dioxin and increases immunoglobulin A concentration in breast milk. *The Journal of Medicinal Food*, 10:134-142, 2007.

## What Professionals in Health Care Say About Sun Chlorella

"Nothing I've found is better for ridding your body of toxins... age-proofing your body with nucleic acids, and Chlorella Growth Factor...revving up your natural defense system...and tuning up your body than Sun Chlorella.

"Sun Chlorella has had a remarkable affect on thousands. It's the closest thing I know to a perfect, 100% natural wonder food."

– Michael E. Rosenbaum, M.D.

"Since I first became aware of it five years ago, I haven't found anything that even comes close to Sun Chlorella in value and benefits.

"I highly recommend that you try Sun Chlorella and take it everyday. It gives you what you're probably missing from your diet and other supplements."

– Mark Drucker, M.D.

"Besides having a balanced blend of omega 3s and omega 6s, Sun Chlorella is also high in "oleic acids," which is the supreme fatty acid abundantly found in olive oil. Sun Chlorella also has important vitamin co-factors (vitamin Bs and beta-carotene) that help your body use fatty acids."

– Shera Raisen, M.D.
