

Sun Chlorella is Significantly More Digestible Than Competitors!

Not all chlorella are considered equal. Here's why: in order for your body to absorb the nutrients inside chlorella, its tough cell wall must be broken down. Inferior brands use methods which not only fail, but actually destroy much of the cell's nutritional value.

Only Sun Chlorella has the patented process utilizing the DYNO[®]-Mill machine. Invented by our founder, Hideo Nakayama, the DYNO[®]-Mill method thoroughly pulverizes the cell wall while preserving the integrity of the nutrients inside.

The result: Sun Chlorella is over 95% digestible, unlike the other brands!

SUN CHLORELLA

Only Sun Chlorella contains 95% – 99% pulverized chlorella, thanks to our exclusive patented process utilizing the DYNO[®]-Mill

Other Brands

"broken cell wall" chlorella

"cold milling" chlorella

"cracked open cell wall" chlorella

"spray dried" chlorella

"sound wave broken" chlorella

"vacuum pressure differential" chlorella

What Makes Chlorella So Good For Your Health?

Chlorella is an absolute treasure trove of health-boosting nutrients, brimming with vitamins and minerals, amino acids, proteins, antioxidants and so much more...

❖ **Chlorophyll:** Known as the "lifeblood of plants," chlorophyll gives plants their green color. A legendary purifier and blood builder, chlorophyll is found in greater concentrations in chlorella than in any other organism.

❖ **Chlorella Growth Factor (CGF):** Only in chlorella will you find this dynamic combination of nucleic acids, polysaccharides and beta-glucans. Acclaimed for its revitalizing powers, CGF is also a superb stimulator of the body's natural defense system, and helps to fortify your body.

❖ **Fiber:** Scientists marvel at chlorella's ability to bind to harmful elements and safely sweep them out of the body. Thanks to the fiber in chlorella's cell wall, harmful invaders in your body can be permanently removed.

❖ **Beta-Carotene:** A powerful antioxidant that can protect your body from destructive free radicals. Ounce per ounce, chlorella contains six times more beta-carotene than spinach!

❖ **Essential Fatty Acids:** Chlorella is rich in these marvelous stimulators of cellular energy. Fatty acids give your body the fuel it needs to stay energized all day long.

❖ **Probiotics:** For healthy digestion, you need lots of "friendly" bacteria to flourish in your system. Chlorella teems with nutrients that encourage their growth and help regulate digestion.

Sun Chlorella

Nature's Perfect Superfood[®]

Experience a Healthier Life

Revitalized Your Body With Sun Chlorella, Nature's Perfect Superfood®

Sun Chlorella is a single-celled, freshwater green algae that brims over with health-giving nutrients. A true superfood, Sun Chlorella contains a wealth of vitamins and minerals, amino acids, protein, fiber, nucleic acids and more chlorophyll than any organism on earth.

Chlorella is the best-selling health supplement in Japan, where its extraordinary powers have long been studied. Many scientific studies now document chlorella's ability to help:

- ❖ support your energy levels
- ❖ aid your body's natural defense system
- ❖ support proper digestion
- ❖ promote joint and muscle health
- ❖ protect your heart and maintain healthy levels of blood pressure and cholesterol
- ❖ support good health as you age
- ❖ detoxify your body of toxins

Why Millions Of People Take Chlorella Every Day

When you take Sun Chlorella, you nourish, purify and protect every cell of your body.

Let's say you decide to initially take Sun Chlorella because you're often tired. After taking it for a while, you likely will discover that not only do you have more energy, but your whole body feels renewed. Your joints may feel better and your skin may look younger. You might even notice that your bowels are regular, your allergies

have subsided, and you're sleeping better. Best of all, you may even feel calmer and happier.

A Perfect Combination of Super-Nutrients

How can one serving of Sun Chlorella taken regularly work so much magic?

The answer lies in chlorella's unique combination of nutrients: per gram, Sun Chlorella provides six times more beta-carotene than spinach, five times more chlorophyll than spirulina and wheatgrass, and twice as much protein as steak. Sun Chlorella naturally contains a perfect banquet of antioxidants, amino acids, crucial minerals such as zinc, iron and magnesium, and much, much more.

And then there are the "powerhouse" nutrients, which you can find only in chlorella.

Chlorella's Unique Power To Purify and Revitalize

Chlorella Growth Factor (CGF) is a unique complex found inside chlorella's nucleus. The engine that drives chlorella's constant reproduction, CGF provides remarkable stimulus to your body's natural defense system and energizes your own natural revitalizing powers.

Chlorella's cell wall has protected it for millions of years, allowing chlorella to flourish as one of the oldest forms of life still on earth. Numerous studies show that chlorella's fibrous cell wall can bind to harmful elements, such as pesticides and heavy metals, and then safely remove them from the body.

Sun Chlorella Helps Build Natural Defenses

"I highly recommend that you try Sun Chlorella and take it everyday. It gives you what you're probably missing from your diet and other supplements."

— Mark Drucker, M.D.

A Health Benefit For Every Member of The Family

Rest assured, you can safely give Sun Chlorella to every member of your family.

In fact, children benefit greatly from Sun Chlorella's ability to support healthy growth. So whether you're a young person coping with constant stress, a mid-life adult seeking a stronger immune system, or a senior citizen struggling with aging, Sun Chlorella can powerfully aid your quest for good health.

Quality Award

2009 and 2010 Grand Gold Monde Selection Award Winner

For two years in a row, Sun Chlorella "A" has been awarded the Grand Gold Award from Monde Selection, widely known as the oldest and most representative, Independent International Institute in the field of Quality Selections in the World.

To learn more about this prestigious honor, visit:
www.superhealth.com/mondeselection

Chlorella is classified as a whole food. You can take Sun Chlorella every day, like broccoli or spinach. Of course, it's always a good idea to consult your doctor about any supplements you take.
