Fortify Your Health Naturally

Sun Chlorella is a single-celled green algae that teems with health-boosting nutrients, including more chlorophyll than any other organism on earth.

At the core of Sun Chlorella's revitalizing power is a dynamic combination of nucleic acids and other nutrients called CGF (Chlorella Growth Factor).

Studies show that CGF can provide such spectacular health benefits that we decided to offer it as a concentrated liquid: Sun Wakasa Plus™.

Every tablet of Sun Chlorella contains CGF. But by supplementing the tablets with the liquid extract, you can receive more concentrated CGF and enjoy magnified health benefits.

"One day I woke up with blurry vision, dizziness and feeling sick. I made an appointment to see an Optometrist, who after conducting a thorough eye examination, could not find any possible cause for my symptoms, so he ordered further tests. I started taking Sun Wakasa Gold Plus™, rich in nucleic acids, and I doubled the recommended daily serving in a desperate attempt to feel better. Within a couple days, my blurry vision was almost gone, and the dizzy spells diminished to the point that I started to feel healthy again. I could have never done it without this marvelous product, Sun Wakasa Gold Plus™. I am continuing to take it and I feel better and better every day. Thank you Sun Chlorella USA!"
